

C2  
confining pressure of 0.3 psi, such that said composition is absorbed by said absorbent structure.

Sub D1  
C3  
37. (Twice amended) A process of cleaning a surface, said process comprising the steps of: applying a cleaning effective amount of a detergent composition to said surface, said detergent composition containing no more than about 0.4% by weight of detergent surfactant and having a pH of more than about 9, said pH being provided by 2-amino-2-methylpropanol; and wiping said surface with an absorbent structure comprising a superabsorbent material having a capacity for water of at least about 15 g/g when measured under a confining pressure of 0.3 psi, such that said composition is absorbed by said absorbent structure.

Please add new Claims 48, 49, 50 and 51, as follows.

Sub D1  
C3  
48. (new) The kit of Claim 31 wherein the pH is provided by a volatile alkaline compound.

49. (new) The kit of Claim 48 wherein the volatile alkaline compound is 2-amino-2-methylpropanol.

50. (new) The process of Claim 33 wherein the pH is provided by a volatile alkaline compound.

51. (new) The process of Claim 50 wherein the volatile alkaline compound is 2-amino-2-methylpropanol.
